Version 1 | October 2026

OVERVIEW

The whole app on one page

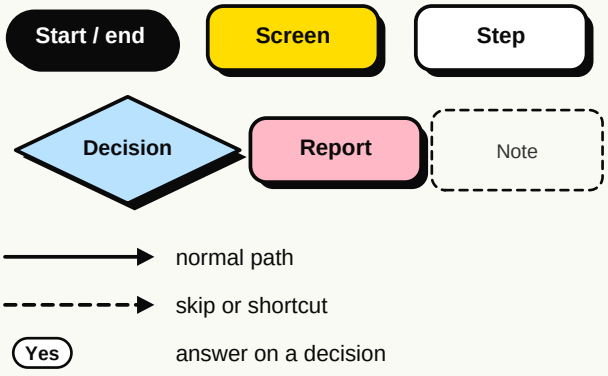

Every screen a person can reach and how the screens connect.

WHERE TO FIND THE DETAIL

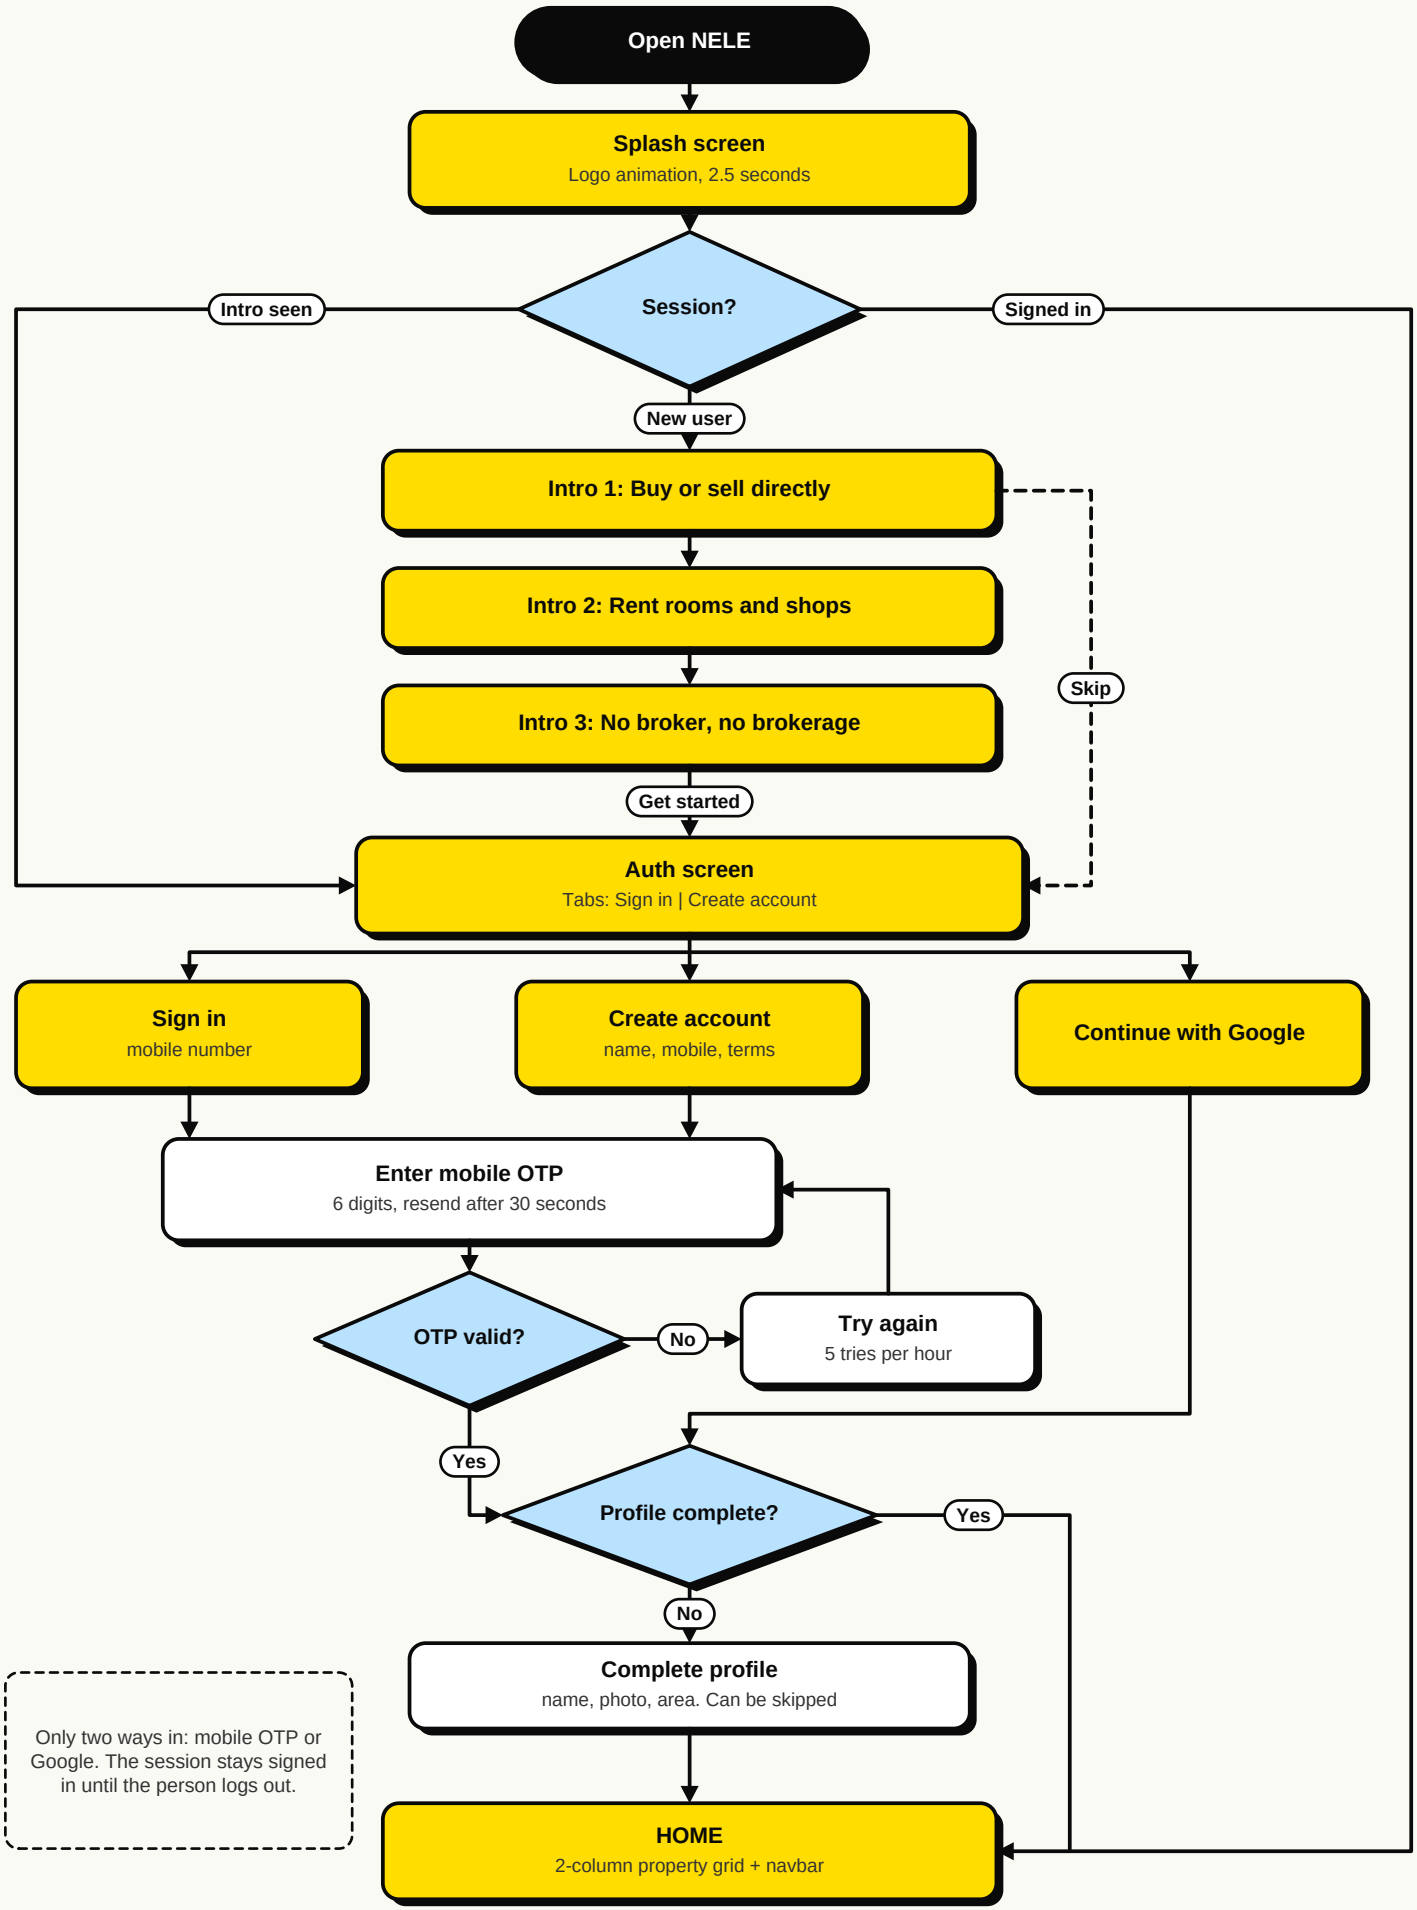

Flow 01	Launch, onboarding and sign in	**p. 3**
Flow 02	Browse, chat and WhatsApp	**p. 4**
Flow 03	Add a property	**p. 5**
Flow 04	Profile, settings, privacy	**p. 6**
UI	Screen blueprint and design tokens	**p. 7**
Prompt	Lovable prompt	**p. 8**

HOW TO READ THE CHARTS

FLOW 01 Launch, onboarding and sign in

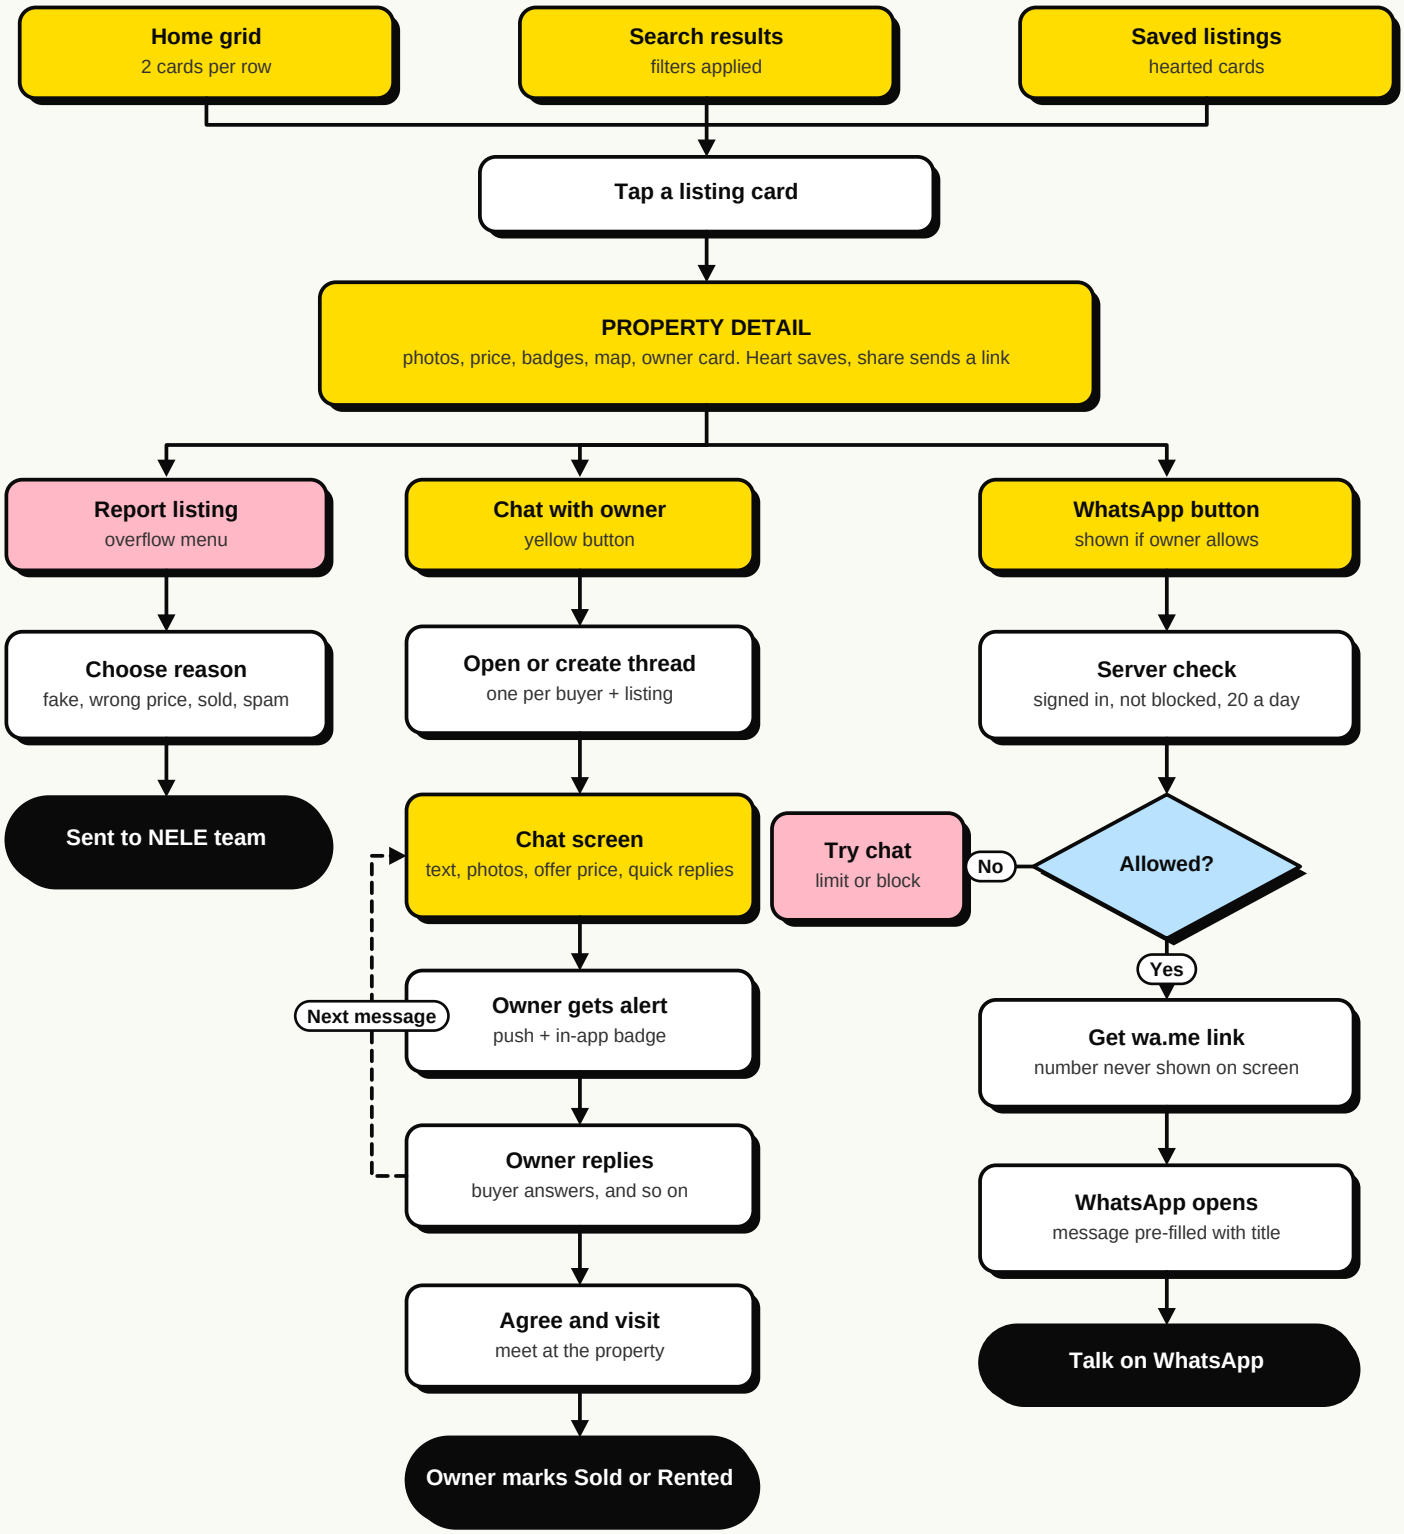

From tapping the app icon to the Home screen.

FLOW 02

Browse, chat and WhatsApp

From finding a listing to talking to the owner.

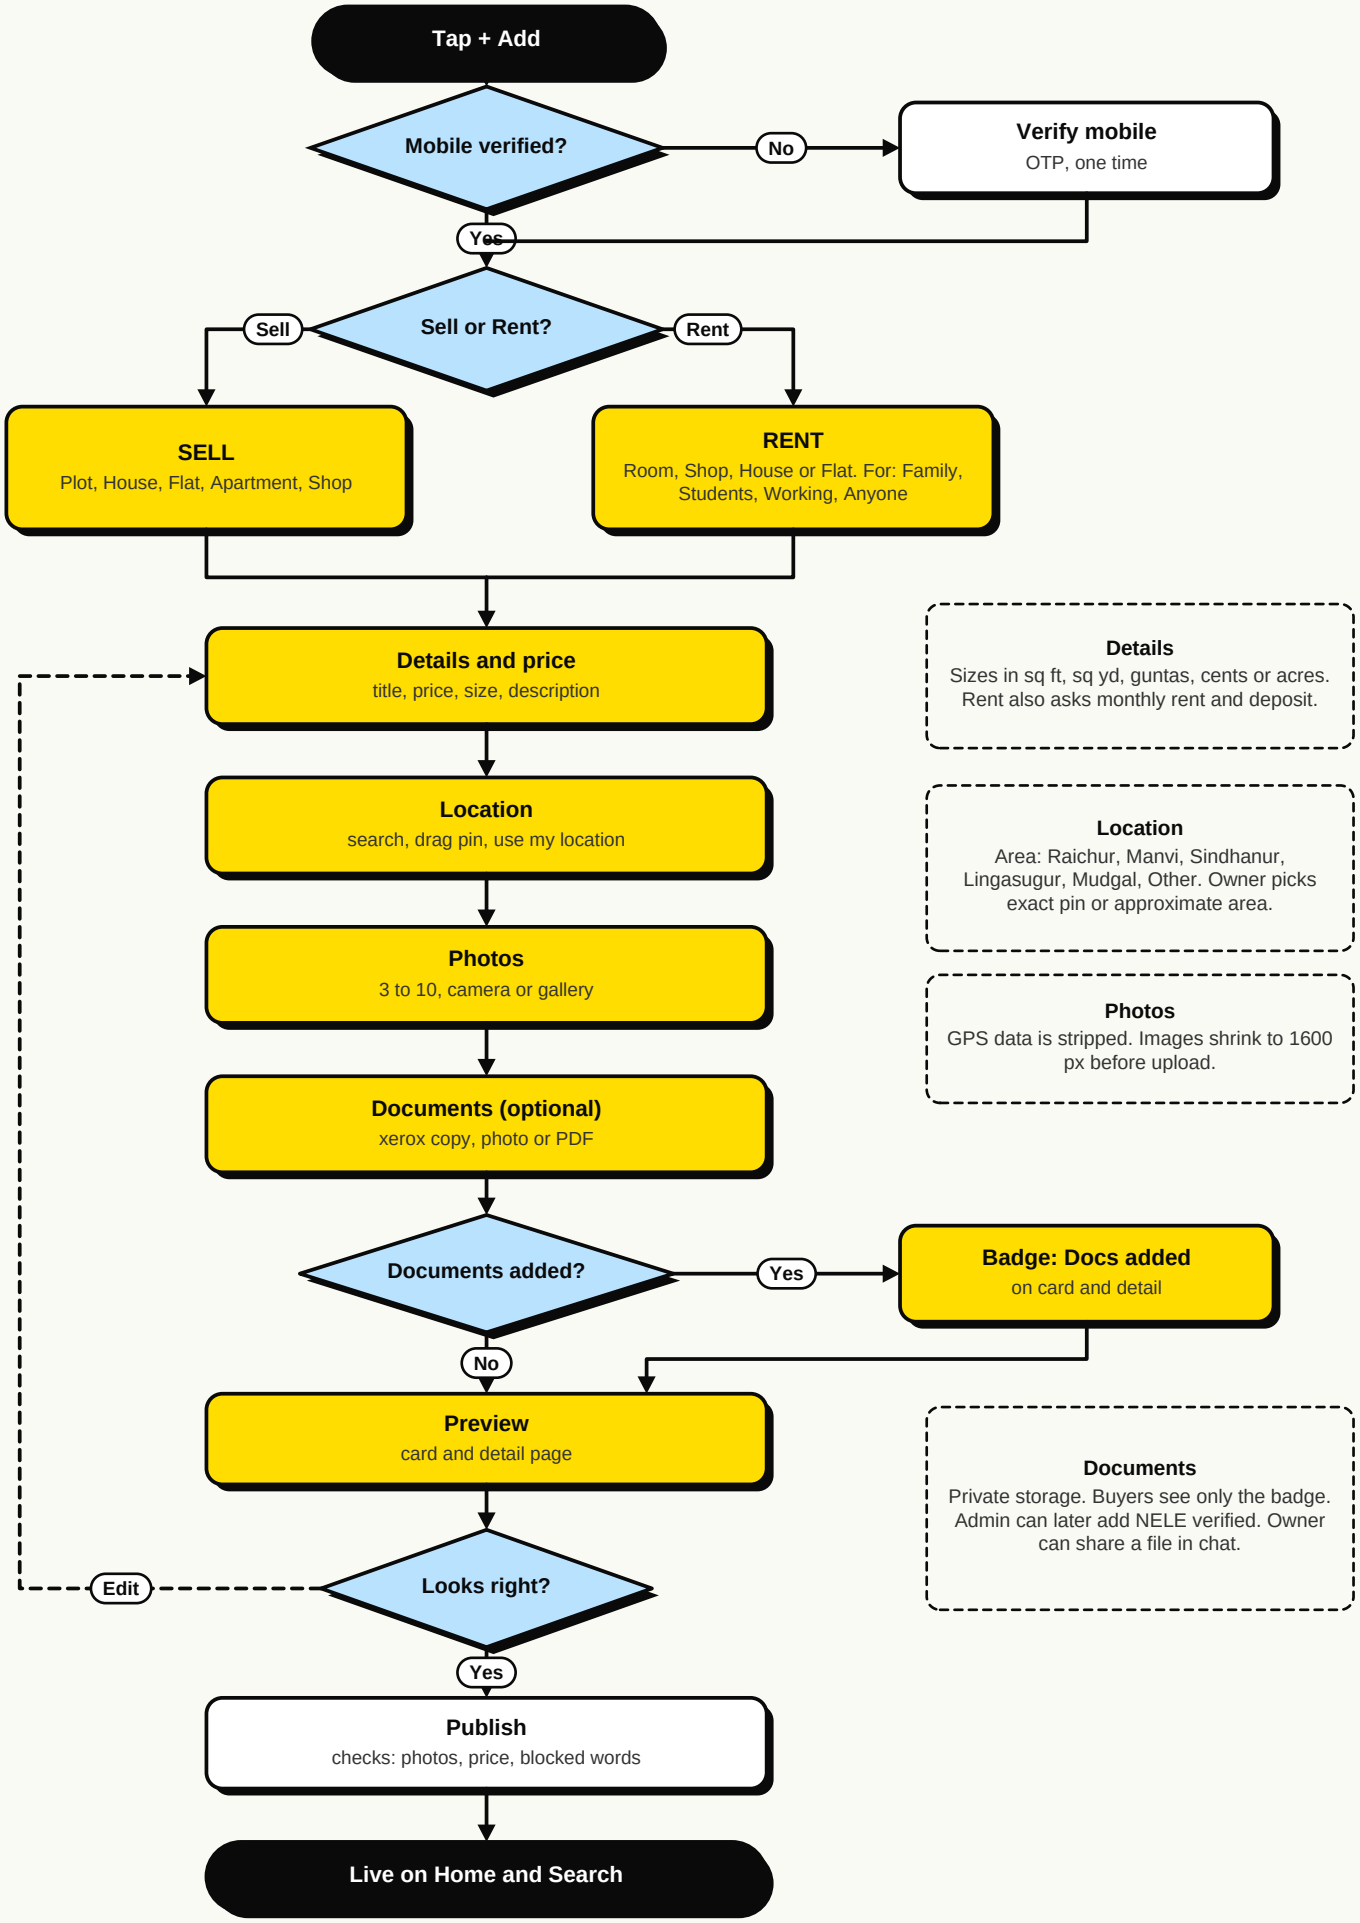

Documents
Buyers see a badge only. "Ask owner to share" opens the chat with a ready message.

Chat
Realtime messages, unread count on the Chats tab, offers with Accept or Decline, Block and Report.

WhatsApp
The link comes from a server function after the checks. The number is never in the page.

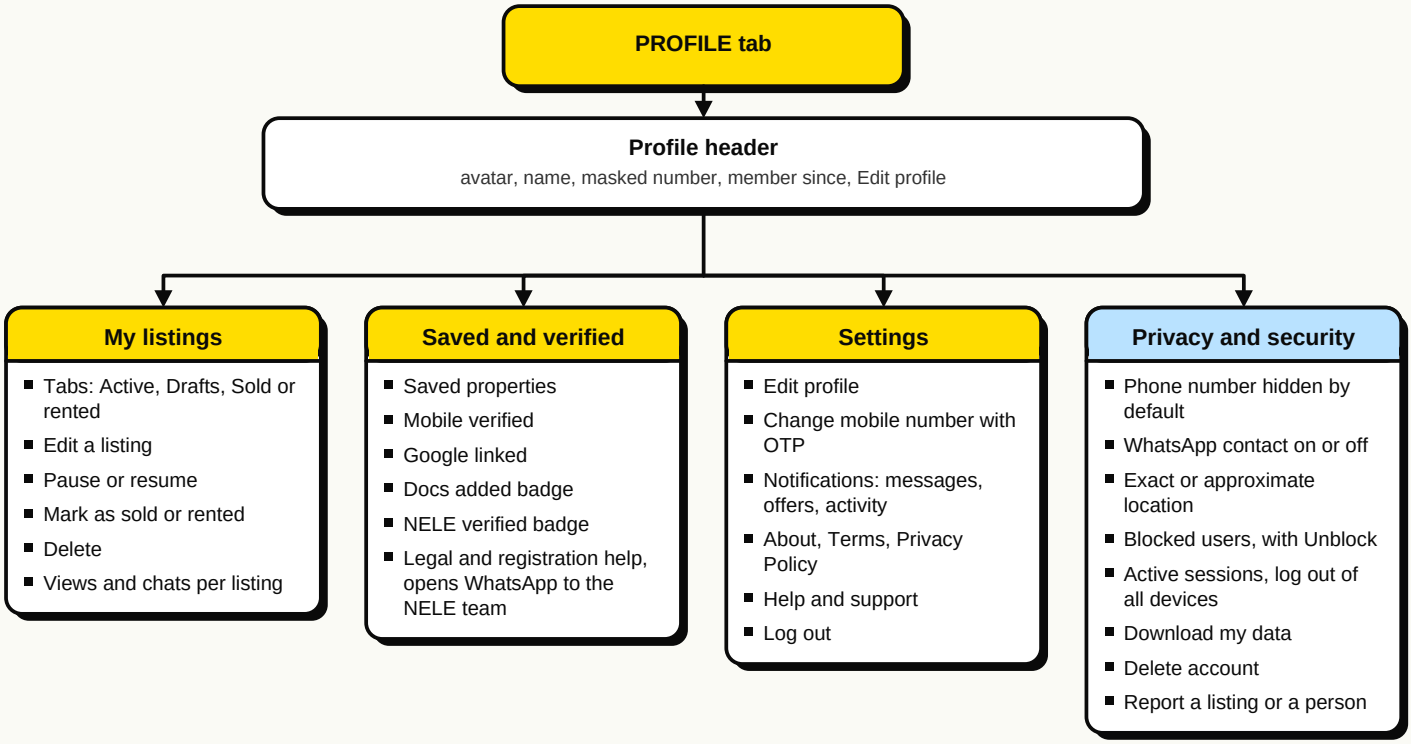

FLOW 03 Add a property

Sell or rent. Documents are optional and earn a badge.

FLOW 04 Profile, settings, privacy and security

Everything behind the Profile tab.

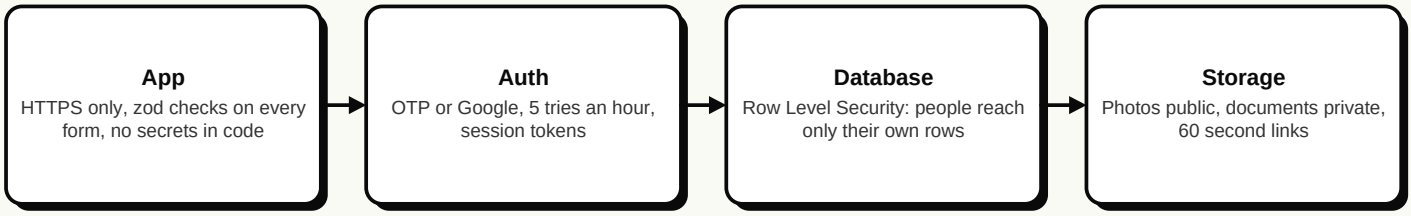

DELETE ACCOUNT

LOG OUT OF ALL DEVICES

SECURITY LAYERS

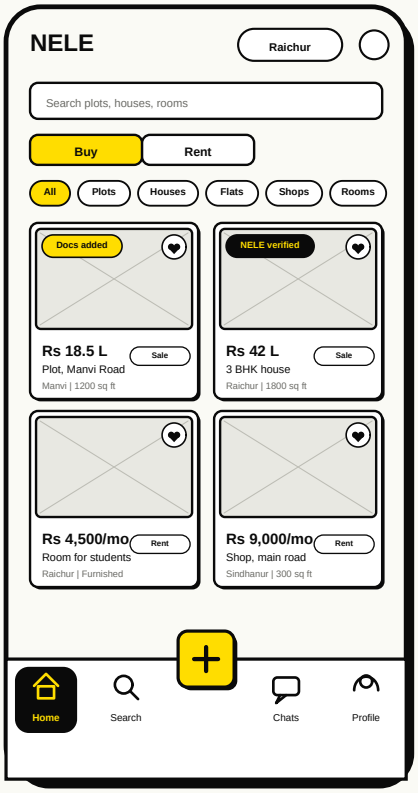

Admin

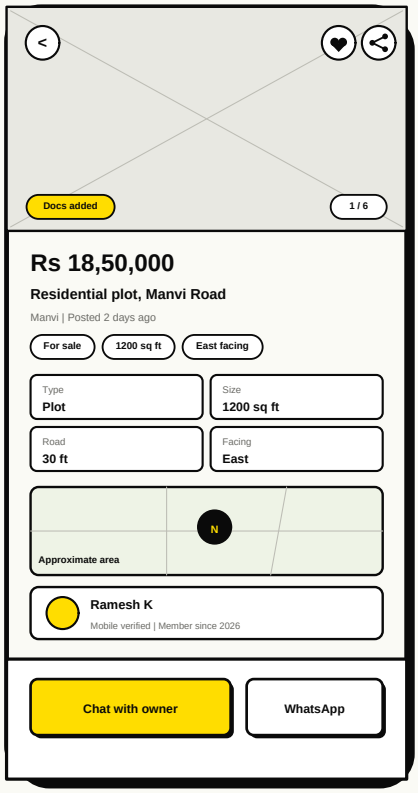

Admin rights live in a separate roles table and are checked on the server. Reports from people go to an admin queue.

UI Screen blueprint and design tokens

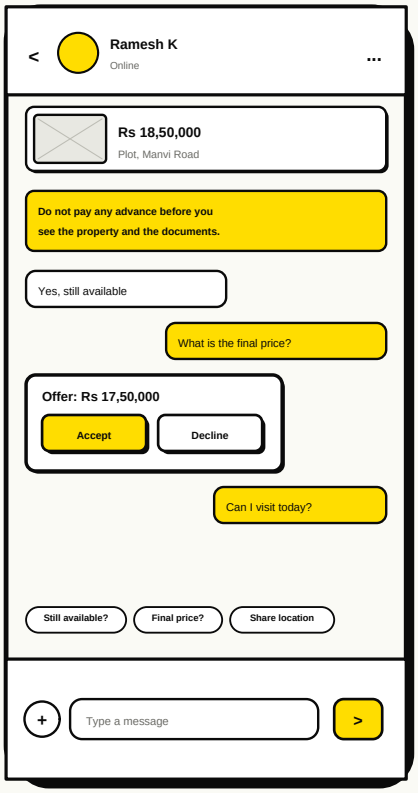

Neobrutalism: black borders, hard shadows, one yellow. Rough layouts for Lovable to follow.

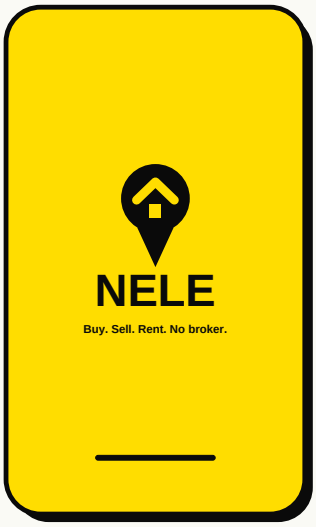

Home: 2 cards per row

Property detail

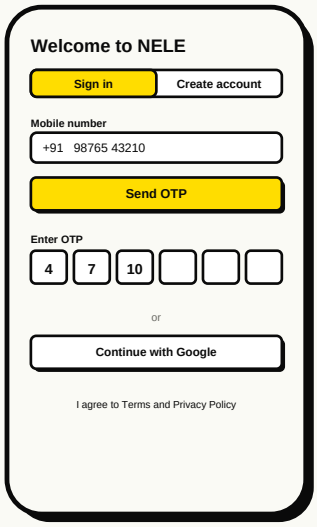

Chat with the owner

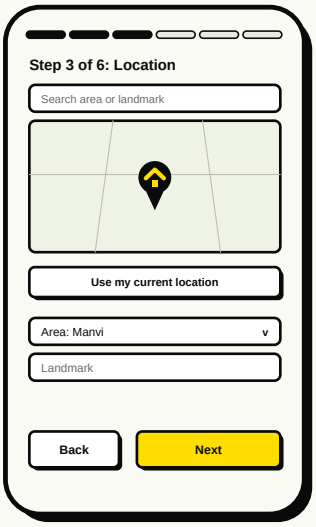

Splash with logo animation

Onboarding, 3 slides

Sign in with OTP

Add property: location

DESIGN TOKENS

#FFDD00	#0A0A0A	#FFFFFF	#FAFAF5	#E8E8E2	#FF5C5C
Primary	Ink	White	Page	Gray	Danger

Contact owner | WhatsApp

Docs added | NELE verified | For sale | For rent

Type	Space Grotesk Bold for headings and prices, Inter for body. 14 px minimum.
Shape	2 px black border, 10 px radius, hard 4 px shadow. No gradients.
Motion	Buttons press down 3 px. Splash runs 2.5 s and respects reduced motion.
Avoid	Emoji, sparkle icons, status dots and tiny helper text.

PROMPT

Lovable prompt for NELE

Paste the master prompt below into Lovable. The same text is in the .txt file for easy copying.

How to use it. 1) Open Lovable and start a new project. 2) Paste everything under MASTER PROMPT. 3) If Lovable stops halfway, send it in parts. The order is on the last page. 4) Lovable builds a mobile-first web app. To get a Play Store app later, wrap it with Capacitor.

MASTER PROMPT

Build "NELE", a mobile-first real estate marketplace where people buy, sell and rent property directly from owners, with no broker and no brokerage fee. Main market: Raichur district, Karnataka, India. English only. Design it at 390 px width, make it an installable PWA, and on desktop show it inside a centered 480 px wide app container.

1. Tech and backend

- React, Vite, TypeScript, Tailwind CSS, shadcn/ui, lucide-react icons, React Router, TanStack Query, zod for validation.
- Supabase backend (Lovable Cloud): Auth, Postgres, Storage, Realtime. Row Level Security on every table.
- Google Maps JavaScript API with Places Autocomplete. Keep the key as a secret and ask me for it when you need it.
- Login by mobile number OTP (Supabase phone auth) and Google sign-in. Ask me which SMS provider to connect.
- PWA: manifest, app icons, theme color #FFDD00, standalone display.
- Prices in Indian number format with the rupee symbol, for example ₹18,50,000 and ₹4,500 / month.

2. Design system (neobrutalism)

- Colors: primary #FFDD00, ink #0A0A0A, white #FFFFFF, page background #FAFAF5, grays #E8E8E2 and #6B6B66, danger #FF5C5C.
- Every card, input, button and chip has a 2 px solid #0A0A0A border, 10 px radius and a hard shadow of 4px 4px 0 #0A0A0A. Buttons move down 3 px and lose the shadow when pressed.
- Primary button: #FFDD00 background, black bold text. Secondary button: white background, black text.
- Fonts: Space Grotesk bold for headings and prices, Inter for body text. Minimum body size 14 px, buttons 16 px. No tiny helper text anywhere.
- Flat style only: no gradients, no glassmorphism, no glow, no emoji, no sparkle icons, no colored status dots. Show status with words and badges.
- Touch targets at least 44 px, high contrast, visible focus states.
- Every screen has loading skeletons, an empty state and an error state with a Retry button.

3. Navigation

- Fixed bottom navbar, 64 px plus safe area, white, 2 px black top border. Five items: Home, Search, Add (center, a raised yellow square with black border and shadow), Chats (with unread count), Profile. The active item is a black pill with a yellow icon and label.
- The navbar shows on Home, Search, Chats and Profile. It is hidden on Splash, Onboarding, Auth, the Add flow, a chat conversation and Property detail.
- Routes: /splash, /onboarding, /auth, /home, /search, /listing/:id, /add, /chats, /chats/:id, /profile, /profile/listings, /profile/saved, /settings, /settings/privacy, /terms, /privacy-policy.
- Route guard: signed-out users can only open splash, onboarding, auth, terms and privacy policy.

4. Splash screen (logo animation)

- Full-screen #FFDD00. A black NELE mark (a roof line shaped like a map pin) draws itself with an SVG stroke animation over 1.2 s. Then the letters N, E, L, E drop in one by one, 80 ms apart. Then the line "Buy. Sell. Rent. No broker." fades in. Total time 2.5 s. Respect prefers-reduced-motion.
- Then route automatically: signed in goes to /home, signed out with intro already seen goes to /auth, first launch goes to /onboarding.

5. Onboarding (3 slides)

- Swipeable slides with 3 progress bars, Skip at the top right, and a Next button that becomes "Get started" on slide 3. Save "intro seen" in localStorage.
- Slide 1, "Buy or sell directly": Plots, houses, flats, apartments and shops straight from the owner.

PROMPT

Lovable prompt for NELE

Paste the master prompt below into Lovable. The same text is in the .txt file for easy copying.

- Slide 2, "Rent rooms and shops": Rooms for families and students, shops for small business.
- Slide 3, "No broker, no brokerage": Chat in the app or message the owner on WhatsApp. Keep every rupee.
- Simple flat SVG illustrations in black, white and yellow. No stock photos.

6. Auth (create account and sign in)

- Two tabs: Sign in and Create account.
- Sign in: mobile number (+91, 10 digits), Send OTP, then a 6 box OTP input with auto-advance and paste support, resend after 30 s, max 5 attempts per hour, clear error messages.
- Create account: full name, mobile number, a checkbox "I agree to the Terms and Privacy Policy" with links, then the same OTP step.
- A "Continue with Google" button on both tabs.
- First login opens "Complete your profile" (name, optional photo, area dropdown). It can be skipped.
- Persistent session so the user stays signed in until they log out.

7. Home

- Top bar: NELE wordmark on the left. On the right, an area chip (All areas, Raichur, Manvi, Sindhanur, Lingasugur, Mudgal) and a notification bell.
- Search bar below the top bar. Tapping it opens Search.
- A Buy | Rent segmented switch, then horizontally scrolling category chips: All, Plots, Houses, Flats, Apartments, Shops, Rooms.
- Property listing as a 2 column grid (two cards per row), infinite scroll with 10 per page, skeleton cards while loading, pull to refresh.
- Property card: 4:3 photo with a border. Top-left badge: "Docs added" (yellow background, black text) or "NELE verified" (black background, yellow text). No badge when the owner added no documents. Top-right heart to save. Under the photo: price in bold, a one-line title, locality and size, a tag "For sale" or "For rent" (plus "Students" or "Family" when set), and how long ago it was posted.

8. Search and filters

- Search input with recent searches.
- Filter bottom sheet: Buy or Rent, property type, price range, area or village, size, bedrooms (houses and flats), furnishing (rent), suitable for (Family, Students, Working people, Anyone), and a "Documents added only" switch.
- Sort: Newest, Price low to high, Price high to low.
- Results use the same 2 column grid. Active filters show as removable chips.

9. Property detail

- Header: back, save (heart), share. Photo carousel with a counter (1/6) and a full-screen viewer.
- Price (large), title, tags, badges, posted date. Key facts grid (type, size, facing, floor, furnishing, deposit or rent as relevant). Description with Read more.
- Location: Google map with a pin and the locality name. The owner chooses exact pin or approximate area. Default is approximate for rooms and houses for rent.
- When documents exist: a card "Owner has added documents". Buyers cannot download them. A button "Ask owner to share" opens the chat with a prefilled message.
- Owner card: name, member since, "Mobile verified". The owner's phone number is never shown on screen.
- Sticky bottom bar: Chat (primary yellow) and WhatsApp (secondary). WhatsApp only appears if the owner allows it.
- Overflow menu: Report listing (fake, wrong price, already sold, spam, other).
- A "Similar properties" row at the end.

10. Chat (OLX style)

- Chats tab is an inbox with one thread per buyer and listing. Each row: listing thumbnail, other person's name, last message, time, unread count.
- Conversation screen: header with a pinned listing mini card (photo, price, title, tap opens the listing). Bubbles: mine yellow on the right, theirs white on the left, both with a black border.

- Send text and photos (camera or gallery). A "Make an offer" button opens a price input and sends an offer bubble that the owner can Accept or Decline.
- Quick reply chips: "Is this still available?", "What is the final price?", "Can I visit today?", "Share location".
- Typing indicator, sent / delivered / read ticks as text, date separators. Realtime with Supabase Realtime. Unread badges.
- Block user and Report in the header menu.
- At the start of every new thread show one safety card in normal size text: "Do not pay any advance before you see the property and the documents."

11. Add property (6 steps)

A step progress bar at the top, draft saved automatically, back button on every step.

- Step 1, Type: Sell or Rent. Sell categories: Plot, House, Flat, Apartment, Shop. Rent categories: Room, Shop, House or Flat. For rent also pick "Suitable for": Family, Students, Working people, Anyone (multi-select).
- Step 2, Details: title, description, price (sale price, or monthly rent and deposit), size with unit (sq ft, sq yd, guntas, cents, acres), and category fields (bedrooms, bathrooms, floor, facing, furnishing, road width for plots).
- Step 3, Location: Google Maps with Places Autocomplete search, a draggable pin, a "Use my current location" button, an area or village dropdown (Raichur, Manvi, Sindhanur, Lingasugur, Mudgal, Other), a landmark field, and a switch for exact or approximate location.
- Step 4, Photos: 3 to 10 photos from camera or gallery. Drag to reorder, the first photo is the cover. Compress to max 1600 px in the browser and remove GPS data (EXIF) before upload. Show upload progress.
- Step 5, Documents (optional): title "Add documents (optional)". Accept photos or PDF scans (xerox copies) of RTC / Pahani, Khata, Sale deed, Encumbrance certificate, Tax receipt. Up to 5 files, 10 MB each. A clearly visible Skip button. Files go to a private bucket. If at least one document is uploaded, the listing automatically shows the "Docs added" badge on cards and on the detail page. An admin can later switch it to "NELE verified".
- Step 6, Preview and contact: preview the card and the detail page. A switch "Allow WhatsApp contact" (uses the owner's verified number). In-app chat is always on. Publish button.
- After publishing: run basic checks (3 or more photos, price above 0, blocked words), set the status to live, and show "Your listing is live" with View listing and Share buttons.

12. Profile

- Header: avatar, name, masked number (+91 98••••••21), member since, Edit profile.
- List: My listings (tabs Active, Drafts, Sold or rented; actions edit, pause, mark as sold or rented, delete; views and chat counts), Saved properties, Verification (mobile verified, Google linked), Settings, Help and support, Log out.
- A card "Need legal or registration help?" that opens WhatsApp to the NELE team (put the number in one config file).

13. Settings, privacy and security

- Settings: edit profile, change mobile number (with OTP), notifications (new messages, offers, listing activity), About, Terms, Privacy Policy, Delete account.
- Privacy and security screen:
  - Phone number hidden by default, with a WhatsApp contact switch.
  - Blocked users list with Unblock.
  - Active sessions and "Log out of all devices".
  - Download my data (request) and Delete account (type DELETE, confirm with OTP; removes profile, listings, documents and photos; chats are anonymised).
  - Documents are private: only the owner and NELE admins can open them, through signed URLs that expire in 60 seconds.
  - Strip EXIF location from every photo.
  - Rate limits on OTP requests, messages per minute, WhatsApp link requests (20 per day per user) and new listings per day.
  - Report listing and report user, reviewed by an admin.
- Security rules: Row Level Security on every table so users can read and change only their own rows. Keep the admin role in a separate user_roles table and check it with a security definer function. Never store roles on the profile. Validate all input with zod on the client and in edge functions. HTTPS only. No secrets in client code.

PROMPT

Lovable prompt for NELE

Paste the master prompt below into Lovable. The same text is in the .txt file for easy copying.

14. Database tables

- profiles(id, full_name, phone, avatar_url, area, allow_whatsapp, created_at)
- user_roles(user_id, role)
- listings(id, owner_id, mode sale|rent, category, title, description, price, deposit, size_value, size_unit, bedrooms, bathrooms, floor, facing, furnishing, suitable_for[], area, address, landmark, lat, lng, exact_location, allow_whatsapp, status draft|live|paused|sold|rented|removed, docs_added, verified, created_at)
- listing_photos(id, listing_id, url, position)
- listing_documents(id, listing_id, path, doc_type, created_at)
- favorites(user_id, listing_id)
- conversations(id, listing_id, buyer_id, seller_id, last_message_at)
- messages(id, conversation_id, sender_id, body, image_url, type text|image|offer, offer_amount, offer_status, read_at, created_at)
- blocks(blocker_id, blocked_id), reports(id, reporter_id, listing_id, user_id, reason, note, status), whatsapp_requests(id, user_id, listing_id, created_at)
- Edge function "get-whatsapp-link": checks the user is signed in, not blocked, the listing allows WhatsApp and the daily limit is not reached, then returns a wa.me link with the message: Hi, I saw your listing "<title>" on NELE. The number never reaches the client any other way.

15. Demo data

- Seed 12 sample listings (6 sale, 6 rent) across Raichur, Manvi, Sindhanur, Lingasugur and Mudgal with realistic rupee prices. Some have "Docs added".
- Use neutral placeholder images (gray block with a house icon and a black border).
- Mark all of it as demo data in the code so it is easy to delete.

IF LOVABLE STOPS HALFWAY, SEND IT IN PARTS

Part	Send this	What you get
Part 1	Intro paragraph + sections 1 to 6	Foundation, design system, navbar, splash, onboarding, auth.
Part 2	Sections 14, 7, 8, 9, 15	Tables and demo data first, then Home, Search and Property detail.
Part 3	Section 11	Add property with Google Maps, photos and optional documents.
Part 4	Section 10	Chat and the WhatsApp link function.
Part 5	Sections 12 and 13	Profile, settings, privacy and security.

Check the preview after each part before sending the next one.
